-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim 1 is objected to because of the following informalities: In Claim 1, line 16, "an" needs to be changed to --and--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 and 7-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Camarota et al.

Camarota et al shows an illuminated handle which includes an illuminated mount assembly 12 and 13, a handle member 11, a light sensor "LS" shown in Figure 20 formed in the mount assembly and a battery power source 712. As set forth in the disclosure, page 9, paragraph 0128, with reference to Figure 25, the lighted handle may include a manually operated on/off switch and/or a light-sensing switch. As shown in Figure 20, the assembly includes a base called a mounting foot 28G. The light sensing switch is shown positioned in the bracket.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Camarota et al.

Camarota et al only discloses the light-sensing switch being positioned within the brackets 12 and 13 and not in the base structure as set forth in Claim 6. The position/location of the sensor is considered a design choice because as long as the sensor is exposed to the ambient light conditions the location of the sensor is not critical to the operation of the device.

Allowable Subject Matter

Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13-15 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Claim 12 recites that the illuminated handle has a rechargeable battery with a solar panel mounted on the assembly electrically connected to the battery and adapted to charge the battery. The combination of a solar panel mounted on an illuminated handle was not shown or suggested by the prior art.

The following is an examiner's statement of reasons for allowance: Claims 13-15 are allowable over the prior art because Claim 13 sets forth an illuminated handle assembly in combination with a rechargeable battery and a solar panel on the assembly

electrically connected to the battery for recharging the battery. This combination of limitations was not shown or suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tiesler et al, Rodgers, Erlich and Lepre are cited of interest for showing illuminated handles.
